

National Crane Series NBT60

Product Guide

ASME B30.5
Imperial 85%

Features

- 39,01 m (128 ft) five-section full power boom
- 54,4 t (60 USt) at 2,44 m (8 ft)
- Self-lubricating Easy Glide wear pads
- Hydraulically removable counterweight system
- Heavy lift load charts available

Features

Five-section boom

The Series NBT60 is equipped with a 39,0 (128 ft) boom. An optional 7,9 m - 13,7 m (26 ft - 45 ft) two-section offsettable manual extension is available.

Counterweight

Two-piece 1361 kg (3000 lb) each (total 2722 kg [6000 lb]) hydraulically removable counterweight slabs. Removable counterweight slabs can be stowed on front outrigger box for roading.

Deluxe operator's cab

The Series NBT60 operator's cab includes all-steel construction with acoustical lining and tinted glass throughout, air conditioning, deluxe seat with arm rest mounted single-axis electric controllers, windshield and sliding skylight with electric wipers, diesel heater with defroster, circulating fan, fire extinguisher, and dual cab mounted work lights.

National Crane NBT60

- 54,4 t (60 USt) maximum capacity
- 41,1 m (135 ft) maximum tip height (main boom)
- 54,6 m (179 ft) maximum tip height (boom with extension)

Outriggers

Equipped with left and right ground-level and in-cab CANbus outrigger controls. The Series NBT60 outriggers allow quick and easy crane set-up and includes a new outrigger beam position sensing system that aids the operator in selecting the right load chart based on the crane's outrigger footprint. The front outrigger box has an X-shaped footprint that eliminates the need for a single front outrigger.

Dimensions:

Full span:

Front: 7,09 m (23 ft 3 in) Rear: 7,39 m (24 ft 3 in)

Mid span:

Front: 4,72 m (15 ft 6 in) Rear: 4,90 m (16 ft 1 in)

Retracted-front and rear: 2,39 m (7 ft 10 in)

Features

**Product may be shown with optional equipment.*

National Crane is proud to introduce the Series NBT60 crane

The Series NBT60 represents the pinnacle of machine performance, combining the latest in both hydraulic and electronic machine control. This new product provides premium operator comfort with the latest Manitowoc cab design, simplified machine setup with no need for an SFO and front bumper control of the hoist(s).

- The cable follower will keep constant tension on the rope reducing the potential for bundling
- Speedy-reeve boom tip and sheave blocks simplify rigging changes by decreasing the time needed to change line reeving
- Easy Glide boom wear pads reduce the conditions that cause boom chatter and vibration. The net result is smoother crane operation
- Pressure compensated, load sensing hydraulic system
 - PTO mounted axial piston pump
 - Superstructure mounted reservoir with integral suction valve/filter, return filter, sight gauge, and temperature gauge
 - Oil cooler with 406 mm (16 in) fan and temperature sensor
 - Pressure transducers integral to the lift cylinder holding valve
- LMI system features a 178 mm (7 in) graphical, color display, data logger, error coding, and a USB connection port. Real time crane information is displayed with numerous operator features including: soft metric load chart conversion, hydraulic filter change reminders, an electronic hour meter, and truck diagnostics (fuel level, coolant temperature, and DPF status).
- The display console allows each crane control function to be set independently to reduce speed (100%, 75%, 50%, and 30%)
- Dual axis controls are optional for superior operator control, along with standard air conditioning, a diesel heater and ergonomic seat

Boom and extension combinations data

NBT60-128: Equipped with a 9,7 m - 39,0 m (31.7 ft - 128 ft) five-section boom. This model can be equipped with a 7,9 m - 13,7 m (26 ft - 45 ft) two-section offsettable extension, providing a maximum tip height of 54,6 m (179 ft).

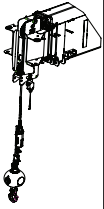

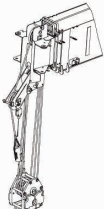

9,7 m - 39,0 m (31.7 ft - 128 ft) five-section full power boom **FJM-0S** 7,9 m - 13,7 m (26 ft - 45 ft) two-section offsettable 0° and 30° manual extension

Note: Maximum tip is measured with outriggers/stabilizers fully extended.

Weight and center of gravity notes:

1. Information provided is for reference only (calculated weights).

2. Weight and CG data is applicable for a standard machine:

128 ft boom

2/3 part line block included

Main hoist only (IPO counterweight installed)

Standard decking with fixed access ladder

No boom extension equipped

No optional turret access step

No aux nose or optional hook blocks

3. All counterweight configurations are shown in table:

Pinned = attached to cylinders and turret (in use)

Stowed = attached to torsion box (not in use)

“2” = top & bottom slabs

“1” = top or bottom slab only

“0” = No slab pinned and/or stowed

If both stowed and pinned columns are “0”, the counterweight is physically removed from the machine. IPO is also assumed removed in this case.

For more information about mounting configuration options, please contact your local National Crane dealer.

Mounting configurations

Configuration 1 -NBT60128 (4-axle Minimum Truck)

Working area	360°
Gross Axle Weight Rating, Front	9072 kg (20,000 lb)
Gross Axle Weight Rating, Rear	29 937 kg (66,000 lb)
Gross Vehicle Weight Rating	39 009 kg (86,000 lb)
Wheelbase (WB)	683 cm (269 in)
Cab to Axle/Cab to Trunnion (CA/CT)	488 cm (192 in)

Frame Strength	785 MPa (110,000 PSI)
Frame Section Modulus (SM); front axle to end of AF	327 cm ³ (20 in ³)
Stability Weight, Front	4445 kg (9800 lb)
Stability Weight, Rear	5670 kg (12,500 lb)
*NOTE: Estimated axles scale weights prior to installation of crane assembly for 85% stability.	

Configuration 2 – NBT60128 (Heavy Lift Truck – Tandem/Tridem)

Working area	360°
Gross Axle Weight Rating, Front	18 144 kg (40,000 lb)
Gross Axle Weight Rating, Rear	29 937 kg (66,000 lb)
Gross Vehicle Weight Rating	48 080 kg (106,000 lb)
Wheelbase (WB)	742 cm (292 in)
Cab to Axle/Cab to Trunnion (CA/CT)	546 cm (215 in)

Frame Strength	785 MPa (110,000 PSI)
Frame Section Modulus (SM); front axle to end of AF	327 cm ³ (20 in ³)
Stability Weight, Front	6940 kg (15,300 lb)
Stability Weight, Rear	5125 kg (11,300 lb)
*NOTE: Estimated axles scale weights prior to installation of crane assembly for 85% stability.	

Mounting configurations

Configuration 3 – NBT60128 (7-axle-Federal Bridge Law Compliant)

Working area	360°
Gross Axle Weight Rating, Front	9072 kg (20,000 lb)
Gross Axle Weight Rating, Rear	29 937 kg (66,000 lb)
Gross Vehicle Weight Rating, Pusher 1	3629 kg (8,000 lb)
Gross Vehicle Weight Rating, Pusher 2	3629 kg (8,000 lb)
Gross Vehicle Weight Rating, Tag	3629 kg (8,000 lb)
Wheelbase (WB)	744 cm (293 in)

Cab to Axle/Cab to Trunnion (CA/CT)	508 cm (200 in)
Frame Strength	785 MPa (110,000 PSI):
Frame Section Modulus (SM); front axle to end of AF	327 cm ³ (20 in ³)
Stability Weight, Front	5341 kg (11,775 lb)*
Stability Weight, Rear	6031 kg (13,295 lb)*
*NOTE: Estimated axles scale weights prior to installation of crane assembly for 85% stability.	

Dimensions

Dimensions

Working range

NBT60: 39,0 m (128 ft boom) with 7,9 m - 13,7 m (26 ft - 45 ft) extension (minimum truck)

*This drawing shows the physical reach of the machine. Always refer to the load chart to see which portions of this diagram are valid for the specific machine configuration and where the loads are structurally or stability limited.

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane.

Load chart

NBT60: 39,01 m (128 ft) boom, 2722 kg (6000 lb) counterweight, 360°, outriggers 100% extended, (minimum truck)

#LMI operating code. Refer to LMI manual for instructions.

**26 ft capacities are applicable to both 26 ft fixed and 26 ft tele extension.

BOOM EXTENSION CAPACITY NOTES:

1. All capacities above the bold line are based on structural strength limitations.
2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
5. Capacities listed are with outriggers properly extended and vertical jacks set only.

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

Load chart

NBT60: 7,9 m (26 ft) fixed and 7,9 m - 13,7 m (26 ft - 45 ft) offsettable extension, 2722 kg (6000 lb) counterweight, over rear, outriggers 100% extended, (minimum truck)

#LMI operating code. Refer to LMI manual for instructions.

**26 ft capacities are applicable to both 26 ft fixed and 26 ft tele extension.

BOOM EXTENSION CAPACITY NOTES:

1. All capacities above the bold line are based on structural strength limitations.
2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
5. Capacities listed are with outriggers properly extended and vertical jacks set only.

Max. boom length at 0° boom angle (no load)	64 ft		64 ft	

NOTE: () Boom angles are in degrees. 80060396

#LMI operating code. Refer to LMI manual for instructions.

**26 ft capacities are applicable to both 26 ft fixed and 26 ft tele extension.

BOOM EXTENSION CAPACITY NOTES:

1. All capacities above the bold line are based on structural strength limitations.
2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
5. Capacities listed are with outriggers properly extended and vertical jacks set only

**26 ft capacities are applicable to both 26 ft fixed and 26 ft tele extension.

BOOM EXTENSION CAPACITY NOTES:

1. All capacities above the bold line are based on structural strength limitations.
2. 26 ft. and 45 ft. extension lengths may be used for single line lifting service.
3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
5. Capacities listed are with outriggers properly extended and vertical jacks set only.

150				450 (33.4)
Min. boom angle for indicated length (no load)	30°	31°	33°	33°
Max. boom length at 0° boom angle (no load)	64 ft		64 ft	

NOTE: () Boom angles are in degrees.

80060410

#LMI operating code. Refer to LMI manual for instructions.

26 ft capacities are applicable to both 26 ft fixed and 26 ft telescopic extension.

BOOM EXTENSION CAPACITY NOTES:

1. All capacities above the bold line are based on structural strength limitations
2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
5. Capacities listed are with outriggers properly extended and vertical jacks set only.

Load chart

NBT60: 39,01 m (128 ft) boom, 0 kg (0 lb) counterweight, 360°, outriggers 50% extended, (minimum truck)

Accessories

Radio Remote Controls –

Eliminate the handling and maintenance concerns that accompany cabled remotes. Operate to a range of about 76 m (250 ft), varying with conditions. Remote transmitter displays LMI information on LCD screen.

• NB6R

Personnel Baskets –

One and two person baskets, gravity hung with swing lock and full body harness. Fast attachment and secure locking systems. Ratings from 181 kg (400 lb) to 544 kg (1200 lb). *Must be used with jib.

• BSA-1
• BSA-R1
• BSAY-2

Calibration for customer jib

• CJIB

Auxiliary Winch –

Second winch redundant to the main, 15,000 lb gear set, two-speed piston motor, cable packer, grooved drum, DRI/LLI standard with 5/8 in Dyform 34LR wire rope

• AW

Spanish-Language Danger Decals, Control Knobs, and Operators' Manuals
